

PERMACULTURE ETHICS

EARTH

CARE

How can we care for living beings (animals, insects, mushrooms, plants, trees, etc)?

Have we left behind anything in nature that doesn't belong there?

Can we recycle that?

How can we make sure that everybody is heard?

How can we take care of ourselves?

How can we take care of others?

PEOPLE

CARE

FAIR

SHARE

How can we share this fairly?

Who else would enjoy what we have harvested or made?

What other species live here, and how can we help them?
